

Less Risk. More Reward.

Quality Built's risk solutions help homebuilders enforce a risk management program that maintains your corporate standards while remaining flexible to customize at the project level.

UP TO YOUR STANDARD

Quality Built partners with builders to integrate our risk assessment services with their standard operating procedures, trade partners, and quality assurance program. Our industry-leading technology helps builders and developers focus attention on the highest risk systems and components.

Only Quality Built provides project-specific training materials for each trade to assure complete and total project integration, from the lowest to highest levels of the organization. We also push training and improvement to the crews based upon the actual data collected.

INTEGRATED BUILDER RISK ASSESSMENTS FOR TODAY'S REALITY

Quality Built goes beyond traditional Builder Risk Assessments. We're construction professionals specializing in the technical and risk management aspects of construction:

- Integrated comprehensive site audits
- High-risk issue identification, elimination, and prevention
- Team education and training to improve efficiencies, minimize waste and maximize profitability
- Documented best practices are shared with divisions and employees to improve and standardize products, processes and procedures
- Consistent and reliable information provided as it relates to your field operations and quality

ON-SITE AUDIT CAPABILITIES EVALUATE & RATE:

- Site Cleanliness, Safety & Security
- Soils & Foundation
- Framing, HVAC & Plumbing
- Exterior Cladding & Roof
- Water Intrusion Protocol
- Fire-Rated & Sound Control Assemblies
- Interior Finishes
- Thermal Conditions

CLIENT-FOCUSED, PROFESSIONAL RISK MITIGATION CONSULTANTS DELIVER:

- Corporate-wide & Project/Operations Risk Assessments
- Quality Assurance Process Advising
- Construction Practices Improvement
- Root Cause Analysis for Building Failure
- Expert Advice from Architects, Engineers, & Other Professionals
