

Disaster Response

If disaster strikes, will you have the tools to respond effectively? Quality Built Rapid Response helps you prepare, then respond with on-site data collection and assessment.

ANTICIPATE. PREPARE. REPORT.

Quality Built is the industry leader in Mass Inspection Management Systems. Our Rapid Response program is a catastrophic data collection and reporting network specific to assessing property condition immediately following any natural or human-caused disaster.

- ISO 9001:2015 certified, ensuring our standardized data collection processes and procedures are reliable, accurate and beyond reproach.
- Protocols mirror many of the FEMA Standard Operating Procedures for Mitigation Assessment Team Processes.
- Nationwide network of over 50,000 experts to serve peak volumes, dispatching first responder assessors within hours and assigning second responders according to each property's needs.

TECHNOLOGY SUPPORTING PEOPLE

Quality Built's proprietary software collects and transmits data directly from the disaster site, with offline back-up procedures where communication networks have been damaged. All data is accessible to key stakeholders in real time via the Quality Built Information Network (QBIN).

Quality Built also enables property owners to proactively communicate important details about their property through a simple online Q&A and photo upload interface. The result? A multi-disciplinary response team can perform a second-tier assessment through virtual inspections, allocating resources to areas most in need.

WHAT YOU NEED, WHEN IT REALLY MATTERS:

- Nationwide service
- Pre-negotiated damage assessment fees – no "price gouging"
- Pre-registration of properties, including vital property info, photos, and asset inventory
- Accelerated assessments for faster recovery
- Detailed reporting for future access
- Peace of mind for part-time residents, property managers, property owners
- Comprehensive digital tools
- Frees time to care for family, friends and pets
- Speeds up the claims handling process and repairs
